

### C.C.T.I. Meeting

The March meeting of the Delia C.C.T.I. group were held last Wednesday Eve. in the parlour of the United Church. Besides the leaders—Mrs. Wallace, Mrs. E. Thompson, and Mrs. F. Tassie—there was a good attendance of members at each meeting.

Meetings opened by reciting the Pledge, followed by the minutes of the previous meeting which were adopted as read. Then the treasurer gave her monthly report.

The first Sunday of the month the group attended the Evening Church Service.

The Ladies were assisted in the Work Service by—Helen Sunberg, Dana Williams, Carol Brenner, Fred Gibson, and Bunny Hunter.

Projects for the month were Sequin Work, a Manicure, and making blocks for the quilt to be finished up by members of the W.M.S.

Each meeting included a few games, and a sing-song period.

A Pot Luck supper was held on April 22nd.

The group opened the Amateur Show with several songs, and the C.C.T.I. will.

Each meeting closed with singing "Taps."

### The Farmer's Income

The following is taken from the Monthly Letter of the Royal Bank of Canada, which says in part—

The farmer who works his own farm has a unique kind of income. The farmer who works his own farm has a unique kind of income. The farmer who works his own farm has a unique kind of income.

To stay in business, a farmer must seek an adequate income. This demands his attention to many varied activities and fields of knowledge. He must keep his soil fertile, plan his crop rotations, balance his livestock program with available feed, and sell his products to the best advantage. He needs to know how to control expense and make efficient use of labour and machinery. Failure to measure up well to any of these requirements is sure to result in at least, lower income and at worst, financial loss.

A neat farmstead is usually an indication of a good manager, but hasty judgments should not be made. Not every

unimproved building is an indication of slackness. The farmer may not have the time or the money to paint because he is waging a gallant battle against the depredations of the weather. year by year, a permanent capital in the way of productive farm land. The important thing in farm management are to keep machinery in good repair, keep necessary fences standing, replace and maintain organic matter in the soil, eradicate weeds and other crop-pests, plant and build or grow whatever protective devices are needed, such as ditches and windbreaks.

Agriculture is anything but static. To look back at farming in Canada's early days—or even in the days of our grandfathers—is to see a picturesque scene, but that sort of farming will not last today. There are still some people content with subsistence farming, but most standards have changed. Farmers require new tools and methods to produce as much as they need.

### SUPPLEMENTS NEEDED

Real food values have been high in the past 3 years due to vitamin A deficiency, but this is not the only natural source, and it is of poor quality for animals. A control will be lost. Such is the case with many other vitamins. This vitamin is essential for animal health. It plays an important role in maintaining the health of the animal, and its deficiency causes a number of diseases. It is also referred to as the anti-inflammatory vitamin.

Symptoms of Vitamin A deficiency vary somewhat according to the severity of the deficiency and the time of life at which it occurs. The most common signs are weakness, loss of appetite, and a general lack of vitality. In severe cases, it can lead to blindness and other serious conditions.

Under normal circumstances, a deficiency will not occur unless the quality of the feed is poor. It is important to ensure that the feed is of high quality and contains all the necessary vitamins.

### Canadian Wheat Acreages

While production in Canada is concentrated in the prairie provinces of Manitoba, Saskatchewan, and Alberta.

The federal bureau of statistics estimates the total wheat acreage to be 29,395,200. Of that total the wheat acreage in prairie provinces will provide 22,928,000 acres.

That is more a balance of 765,300 acres to be needed to meet all the rest of Canada.

The Ontario acreage is placed at 670,000; that of Quebec 10,700; Prince Edward Island 8,800; New Brunswick 1,000; Nova Scotia 1,200; British Columbia 2,700.

#### F.U.A. Head Sees Progress On Farm Program

In a statement from F.U.A. headquarters, President Henry Young expressed satisfaction over several items of legislation enacted at the recent session of the Legislature. His statement is as follows:

We are pleased to see that the Provincial Government is taking action on the following matters at the recent session.

1. The special school grants which will make it possible to reduce the school mill rate to 25 mills for operation of schools.

2. The new system of advances to homesteaders for clearing and breaking land.

3. Amendment to the Assessment Act which will prevent farmers being assessed at an extra rate on land leased to oil companies.

4. New regulations to permit the carrying of passengers in the cab of farm trucks.

5. New regulations under which hunters will be future have to get the farm permit before hunting on his land.

All these matters are F.U.A. demands, and we are glad to see them have been implemented by the Government. We are expecting legislation on the Marketing Act before long and shall continue to work for other items of policy.

### THE WORLD OF WHEAT

By W. O. Malabar  
 Director "Top Trading Team" World Grains Company, Ltd.

#### A Look At Durum Wheat

Durum wheat, popular because of the premium it commands, and also because it is not subject to decay, is coming to be a good deal of attention these days.

Many are anxious to grow it but to do so, recalling the severe frost damage to the Durum wheat during the past two years, especially in Manitoba and parts of Saskatchewan.

There are Durum varieties resistant to race of rust in Western Canada, are now secured, but commercial production is several years away. In the meantime, the standard variety, only one of which shows resistance to race 15-8 and race two of which (Polaris and Golden Bells) will not yield greater than 20 C.W.T. Another Durum because of quality, will continue to be grown this summer throughout the West.

The Durum acreage in Manitoba, mostly owned by Stewart, Carleton or Midland, will undoubtedly be toward 1955. In Saskatchewan, the acreage is being increased.

Stewart and Polaris, will be grown in fair quantity, particularly in the prairie provinces. In Alberta, where Durum acreage is on the increase, Stewart will be the popular variety, although here much of the acreage is not yet under the plow.

Stewart and Polaris, will be grown in fair quantity, particularly in the prairie provinces. In Alberta, where Durum acreage is on the increase, Stewart will be the popular variety, although here much of the acreage is not yet under the plow.

### Rural Electrification

In the estimate for the fiscal year 1935-36, a further \$100 million will be allocated to the revolving fund for electrification. During 1934, approximately 2775 rural electrification projects were identified, bringing the number now estimated, to 29,504. In addition, there are 4,658 farm motor, for total of 34,162 connections.

At the same time, \$1,156,414, of \$4,281,580 has been loaned during the summer period, \$38,792 had been repaid, leaving a balance outstanding of \$1,117,692.

It is expected that from four to five thousand additional connections will be made in 1935.

### Moisture Conditions Good

The Canadian press reports that the soil moisture conditions in Alberta this morning are 20 per cent above normal. Only the Peace River area shows a deficiency, being 11 per cent below average. In Co. 1st Alberta the crops are not at 60 per cent above normal and in south-west Alberta 67 per cent.

### Livestock Production On Irrigated Pastures

Lethbridge Experimental Station Weekly Letter

An amount of increasing pasture and improving soil fertility means farmers are placing a portion of their irrigated land into pasture production. The question is often asked: "What return may be expected when the land is utilized as pasture?" At the Experimental Station, Lethbridge, Alberta, an answer is being made to answer this question and tests are being conducted to determine the productivity of irrigated pastures grazed by sheep and other classes of stock.

In one test yielding over six tons per acre were being used to determine the productivity of various pasture mixtures and different fertilizer treatments in terms of pounds of gain produced per acre. Based on two years experience the average production of all pastures was 425 pounds of gain per acre. The highest production from one pasture was 677 pounds of gain per acre while the lowest was 192 pounds. The sheep were housed on a non-irrigated seasonal system being raised in a fresh field every 7 or 8 days.

Using resulting feed stores on similar pastures the average, expressed in terms of pounds of gain produced per acre, would have been 580 pounds of gain per acre. The highest yielding pastures would have produced 790 pounds and the lowest 300 pounds of gain per acre.

In another test when similar dairy cows were used to graze similar pastures on a rotational system, each acre of pasture produced 3800 pounds of milk. In estimating the yield that can be expected from a pasture, the size and condition of the stock should be taken into consideration. Young, thrifty beef animals weigh

### MAGGIE AND HER FRIENDS

Twelve-year-old Beth Morris, as Maggie Muggins, carries on her shoulders her two puppet friends, Fingered Fiddlers and Grandmother Frog. Looking on benignly is her friend and adviser, Mr. McGarry, played by John Draine. All are seen regularly in the children's series: "MAGGIE MUGGINS," each Friday evening on the CBC Television Network.

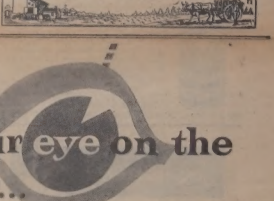

Approximately 600 pounds will require less force to make a pound of gain than a 800 pound pasture. In general the animals benefit in weight as well as the gain per acre will become less.

On the basis of these and other results it is evident that the return from properly managed pasture will be greatly increased with other types of agricultural production.

Adams, American president of the International Ice Hockey Federation, the World Hockey Cup and the Hartman Cup to the Canadian and Russian captain.

## Fashion takes peek-a-boo at surrealists

The lightweight poet Paris original in a peek-a-boo fashion which the young help in modeling at left, isn't causing that look of amusement. The show, below, as to blame. Shown first in Paris, France, due at left looks everywhere when it's right-side-up. This head-dress must be said to have been inspired by the works of Salvador Dali. The little model at right are the works of a friend of artist Bernard Legat. Metallic bonnets and a wimple-mantelet best complete the creation.

SERVICE BY THE FOOT—Police, half tonight's robbery, get service at garage such as this in Taipei, Japanese capital. Popular because less expensive to operate and first class auto, they supply a necessary portion of the capital's transportation. Sociologists estimate that twice. Contrary to popular belief, most are born into 12 customers (here can see well in bright light).

MODEL ILLUSION — The model's the right side, it's the model's that's out of proportion. The huge model is one of several pieces of furniture from the artist's display in Chicago, Ill. by an artist, Legat, in the gallery and education a baby's year of the world.

WILLIAM HARTLEY, 19-year-old nephew of the American, who has been awarded the Medal of Honor for his service in the United States Marine Corps, is shown in the photo when he helped rescue the crew of night from the Danish ship Vega during a violent storm last December.

NOT JACK LYONS, the U.S. woman whose charitable and wife projects while stationed at Chesham, England, brought out the entire village to see him off, in shock with his wife and son.

"LOVE" FOR A MILLION—Three English beauties are willing to pay to be courted—these courted, that is, his challenge in the center right for one hour's night play at the Queen's Park Lawn Tennis club, Birmingham, Birmingham, England. The unique "year as you play" game has attracted the interest of some American girls.

FUNERAL MARKS ARE TRAGEDY—A funeral procession for the 20 victims of a Belgian airplane which crashed near Rome some down a street in the Italian village of Bari. All men make mistakes, but a good many find when he knows he is wrong.—Rafaela. Joan de Arc was 17 when she led the French army to the relief of Orleans.

## Summer/fallow cost depends more on soil type than area

The cost of preparing summer/fallow varies greatly due to a number of factors. Some of these variable factors include soil type, type of farm, type of weeds, number of operations, cost of and use of a banding machinery, labor, management and use of land and timbers.

Farm business studies conducted in the prairie provinces and the two government institutions in Alberta over a period of years show that the cost of summer/fallow depends more on soil type than on size of farm. For example, the cost on a 100-acre farm was \$1.50 per acre, while on a 1,000-acre farm it was \$1.00 per acre. The cost on a 10-acre farm was \$2.00 per acre, while on a 100-acre farm it was \$1.00 per acre. The cost on a 10-acre farm was \$2.00 per acre, while on a 100-acre farm it was \$1.00 per acre. The cost on a 10-acre farm was \$2.00 per acre, while on a 100-acre farm it was \$1.00 per acre.

## New record for assists by a team

Montreal Canadiens have set a new record for assists by a team this season after 61 games. Since the start of the season, the team has recorded 249 assists in 507 games by the Detroit Red Wings.

The Red Wings played 507 games in 1954-55, the most in the league. They scored 230 goals and 230 assists. The Detroit Red Wings played 507 games in 1954-55, the most in the league. They scored 230 goals and 230 assists.

## Manitoba's 1954 agricultural production lowest in 8 years

Manitoba's agricultural production dropped to its lowest level in eight years in 1954, it is revealed in the annual report on crops and livestock prepared by the Manitoba Department of Agriculture.

Total net return of \$180,000,000 was reported in the 1954 report. This is the lowest since 1946. The report also shows that the value of agricultural production was \$1,000,000,000 in 1954, the lowest since 1946.

The report also shows that the value of agricultural production was \$1,000,000,000 in 1954, the lowest since 1946. The report also shows that the value of agricultural production was \$1,000,000,000 in 1954, the lowest since 1946.

## Only 10 percent rural youth eligible have joined 4-H

Although membership in 4-H clubs in Canada has reached an all-time high of almost 70,000 only about 10 percent of rural youth eligible have joined this national movement according to the annual report presented to the Canadian Council on 4-H club secretary manager, James D. Moore.

Mr. Moore told the convention that 44.7 percent of the members were girls and that the average age of all club members, both boys and girls, was 13.5 in 1954. This is a slight increase from 13.4 in 1953.

The increased emphasis on club members has been a result of the fact that the number of club members has increased by 14.4 percent in 1954. The increased emphasis on club members has been a result of the fact that the number of club members has increased by 14.4 percent in 1954.

## Will be first time if four lead scoring

If players from the Montreal Canadiens hold the top four spots in the National Hockey League individual scoring parade at the end of the season, it will be the first time in history that four players have led the league.

Three times in the past top four scorers have been from the same team. The last time was in 1940-41 when the Montreal Canadiens had four players in the top four.

Montreal's four players are Maurice Richard, Jean Beliveau, and two others. The Canadiens have been the top team in the league for several years.
